

800HP

2017 YENKO/SC

SUPERCHARGED

An American-made Super Car unlike any other!

In 1969 the muscle car wars were in full swing, with GM, Ford and Chrysler each developing their own big-block powered performance cars. Not to be outdone, Chevrolet's Central Office Production Order (COPO) system produced a limited run of Camaros with the now infamous ZL-1 all-aluminum big-block engine, and just two very rare ZL-1 factory-built Corvettes.

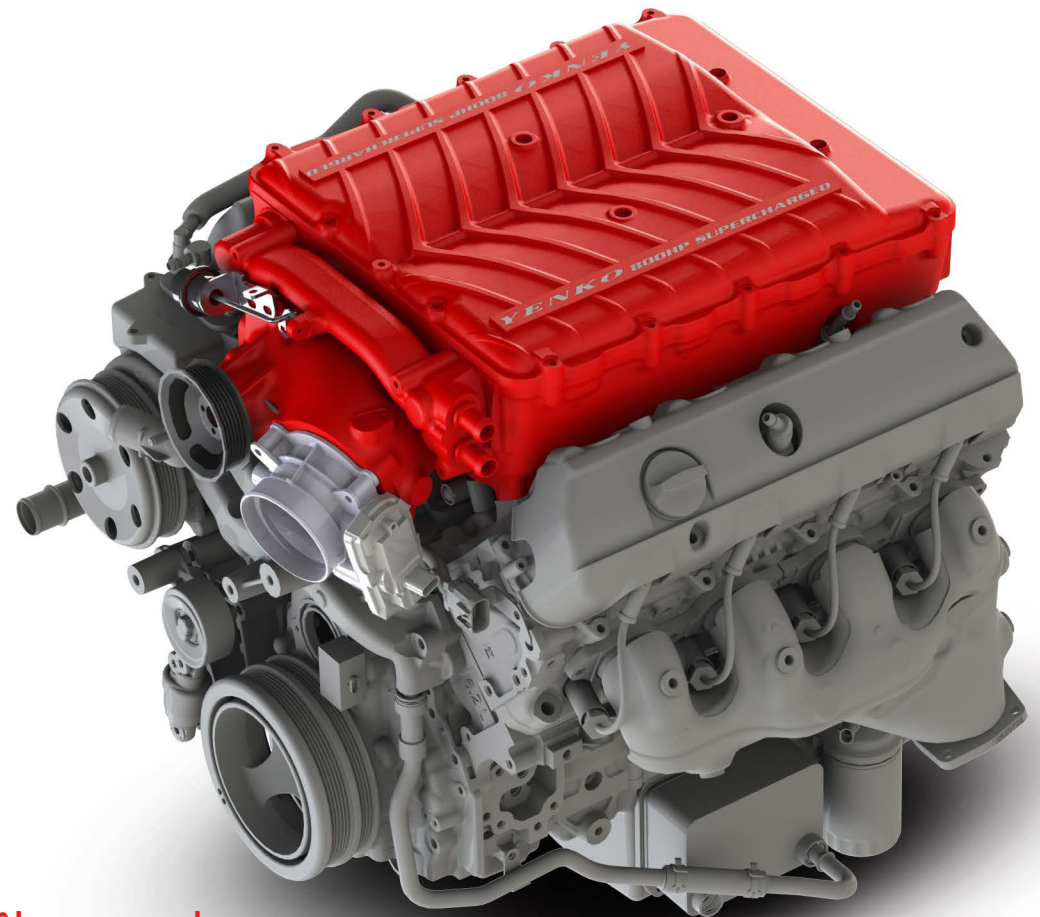

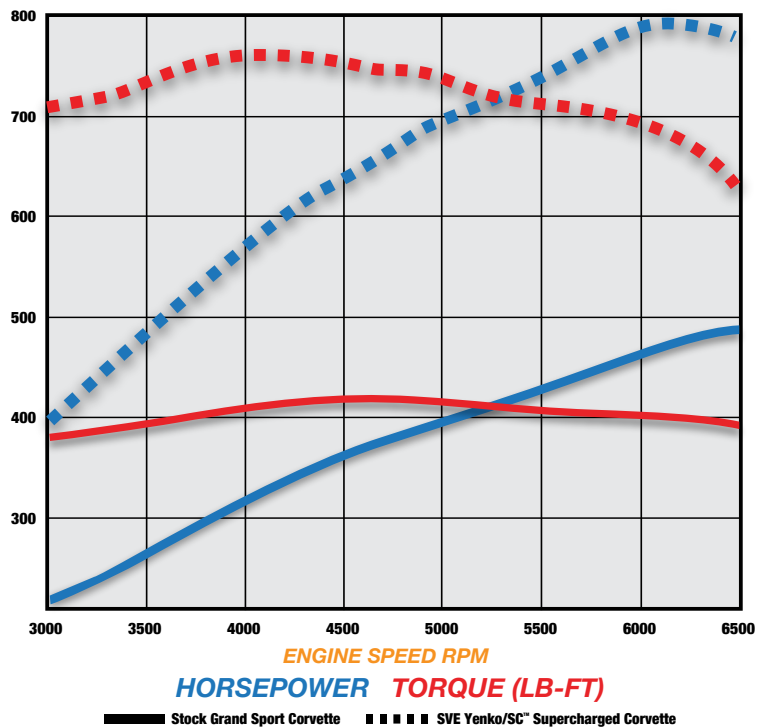

Now in the spirit of those awesome ZL-1 Corvettes, and in the tradition of the 55,000+ specialty vehicles SVE (formerly SLP Specialty Vehicles) built for GM and its dealers over the last 25 years, Specialty Vehicle Engineering (SVE) introduces the 2017 Yenko/SC™ Corvette. Only 50 of these Limited Edition Specialty Vehicles will be built and with an 800 horsepower supercharged 416 C.I.D. LT-1 powerplant, they'll go fast...literally!

the Heart and Soul of the 2017 Yenko/SC™ Corvette is SVE's Supercharged, custom-built 416 C.I.D. (6.8L) LT-1 Engine*. This powerhouse motor delivers **800 horsepower with 750 lb-ft of torque** and features a blueprinted LT-1 Aluminum Block, computer-balanced rotating assembly including race-quality forged 4340 steel crankshaft and H-beam rods, forged aluminum pistons, CNC ported and polished LT-1 cylinder heads, and a custom supercharger, utilizing an LT-4 fuel system and injectors.

*Not emission legal in California and can only be legally used while participating in sanctioned motorsports racing events.

**2017 YENKO/SC™ SUPERCHARGED CORVETTE
FLYWHEEL HORSEPOWER and TORQUE (lb-ft)**

SVE's modified supercharged LT-1 engine with 800 horsepower and 750 lb-ft of torque make this the baddest Yenko Super Car ever!

this Limited Edition 2017 Yenko/SC™ Corvette is available in coupe or convertible models with either manual or automatic transmissions, just like many of the early Corvettes were equipped.

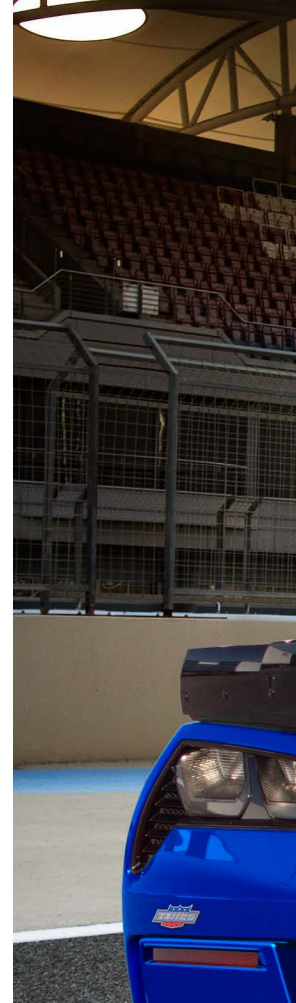

We based it off the Grand Sport model that includes all of the great handling, appearance, and body components featured on the Z06, to properly balance the awesome power of SVE's 800 horsepower supercharged engine – features that include Brembo brakes with 14" rotors and 6-piston calipers in front, and 13.4" rotors with 4-piston calipers in the rear; magnetic ride control; performance calibrated stabilizer bars; limited-slip differential; dry sump oil system, 7-speed manual transmission with active rev match; available 8-speed paddle-shift automatic with specific performance calibration, wider rear fenders, plus many more Z06 performance components.

An optional Ground Effects Package is available that offers the same aggressive Z06-style front splitter and side rockers. Painted in Carbon Flash Metallic finish to match the rear diffuser and optional Z06 spoiler.

The YENKO emblem is displayed on the front fender vents and rear fascia (shown at right).

The 2017 Yenko/SC™ Corvette comes standard with the rear diffuser painted in Carbon Flash Metallic finish, four diffuser fins, a cast aluminum quad exhaust tip with brushed aluminum face, and an integrated Yenko nameplate.

An optional paint scheme is available as shown for the rear diffuser with the top half painted body color and the lower half left in the factory Carbon Flash Metallic finish.

Yenko/SC™ Supercharged Corvette shown with rear fascia Yenko crest and 800HP badge, Yenko fender grille badges, s/c centercaps, Yenko/SC™ side stripe, and cast aluminum quad exhaust tip, and optional Z06 clear Wickerbill adjustable spoiler center. Factory GM wheels shown.

Destined to Become a True Classic!

the interior Styling

of the 2017 Yenko/SC™ Corvette makes this Specialty Vehicle even more unique. Enhancements like the numbered billet aluminum door sill plates (1) remind everyone the car they're stepping into is an 800HP Supercharged Yenko. The center console badge (2) also displays the car's build number as well as the horsepower and torque of this awesome Supercar. Both floor mats feature the Yenko crest embroidered in silver stitching (3). The bottom of the steering wheel (4) and seat trim* (7) also features the Yenko Crest and the sYc logo is embossed into both door panels (5) and seat head rests (6).

*Only available on GM's optional Competition Sport Seats

Personalize

your 2017 Yenko/SC™ Corvette with a selection of 9 colors for the hood, roof, decklid and side stripes. The side stripe graphics are made from OE-quality vinyl and are resistant to fading, cracking, and peeling. The hood stripe, hood vent, and roof stripe is painted to match. With 90 color combinations between the stripes and the Corvette factory body colors, there's a combination to suit your style.
