

2017 - 2019 Corvette: Service Bulletin: Brake Cooling Deflectors/Ducts for J56 and J57 Brakes (Track Use Only)

#16-NA-363: Brake Cooling Deflectors/Ducts for J56 and J57 Brakes (Track Use Only) - (Feb 26, 2018)

Subject: Brake Cooling Deflectors/Ducts for J56 and J57 Brakes (Track Use Only)

Brand:	Model:	Model Year:		VIN:		Engine:	Transmission:
		from	to	from	to		
Chevrolet	Corvette Grand Sport and Z06	2017	2019			All	All
Chevrolet	Corvette ZR1	2019	2019			All	All
<i>Involved Region or Country</i>				North America, Europe, Japan, Middle East, Russia			
<i>Additional Options (RPO)</i>				Equipped with Brake System (J56 or J57)			
<i>Condition</i>				Dealers and customers may question what should be done with the loose shipped brake cooling deflectors, brake cooling ducts, and metal blocker rings while performing the pre-delivery inspection (PDI).			

Correction

Brake cooling ducts and metal wheel blocker rings are intended for track use only.

Note: The metal wheel blocker rings are included with the J56 RPO brake system only.

These parts should not be installed during the PDI process. Only the front lower control arm deflectors should be installed during the PDI process.

Only install the front lower control arm plastic brake cooling deflector during the PDI process.

The additional brake cooling parts should be provided to the customer. The customer may want the parts installed prior to his or her track event.

<i>Version</i>	3
<i>Modified</i>	December 13, 2016 – Added additional RPO J57 and added Note regarding the metal wheel blocker rings being only equipped with RPO J56. February 26, 2018 – Updated the Models and added the 2018-2019 Model Years.
