Subject: 00103 - Product Emission Campaign Emission Label Error

Models: 2001 Chevrolet Corvette Equipped with 5.7L Engine (RPO LS6 - Vin Code S)

To: All Chevrolet Dealers

Attn: Service Managers, Parts Managers, and Warranty Administrators

This campaign is in effect until August 31, 2001.

CONDITION

General Motors has decided that certain 2001 Chevrolet Corvette model vehicles, equipped with a 5.7L (RPO LS6 - VIN Code S) engine, were built with an incorrect vehicle emission control label. The label shows an incorrect emission vacuum hose routing schematic.

CORRECTION - U.S.

A new vehicle emission control label needs to be installed on the left front wheel well. Since a new label can be easily installed, and to reduce customer inconvenience, the label will be sent with installation instructions directly to customers of record. Customers may install the label on the left front wheel well. However, if they desire, they may bring the label to their dealer for installation at no charge at any time until August 31, 2001.

CORRECTION - CANADA

Dealers are to install a new vehicle emission control label on the left front wheel well as shown in the illustration. This will be performed at no charge to the customer until August 31, 2001.
