

2006 Corvette Z06: GM TechLink: Vehicle Identification Number

VIN

After the first 140 Corvette Z06s were built with a VIN Y designation for the engine, it was changed to VIN E. The LS7 engine is installed in all of the cars.

TIP: For these first 140 vehicles, it is necessary to use the letter E (instead of the Y on the plate) when specifying the vehicle in SI and on the Tech 2.

General Motors bulletins are intended for use by professional technicians, not a "do-it-yourselfer". They are written to inform those technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions and know-how to do a job properly and safely. If a condition is described, do not assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See a General Motors dealer servicing your brand of General Motors vehicle for information on whether your vehicle may benefit from the information.
