

1957 Corvette: Chevrolet Technical Test Report: Fuel Economy - Fuel Injection vs. Carburetion

Below is an interesting Chevrolet Technical Test Report released on June 21, 1957 comparing the fuel economy of fuel injection vs carburetion.

SHEET NO. 1
NO. OF SHEETS 1
WORK ORDER 7769-75
DATE 6-3-57
FILE NO. MRK 6

HIGHWAY AND CITY TRAFFIC
FUEL ECONOMY COMPARISON
OF FUEL INJECTION VS. 4-
BBL CARBURETION.

FINAL REPORT

OBJECTIVE

To compare latest fuel injection equipped cars with production carburetion on performance and economy.

CONCLUSION

Results from highway fuel economy and city traffic run indicates fuel injection units are slightly more economical than 4-bbl carburetion. Performance seems to be somewhat equal. Constant speed fuel economy is better with fuel injection units at high speeds, (80-50 MPH) but slightly to considerably worse than 4-bbl carburetion at low end (40-20 MPH)

TEST RESULTS

The tabulation below shows results of Highway fuel economy check:-

CAR NO.	FUEL SYSTEM	TRANSMISSION	MPG
553	1957 Carter 4-BBL carburetor and Air Cleaner	Turboglide	17.0
7163	1958 RPD Carburetor and 1958 Air Cleaner	Powerglide	17.0
281	#7014800 Fuel Injection Unit	Powerglide	16.5
215	#7014800 Fuel Injection Unit	3-Speed O/D	18.1
463	#7014800 Fuel Injection Unit	Turboglide	17.1
599	#7014900 Fuel Injection Unit	Turboglide	17.4

Average speed was 43.0 MPH for distance of 245 miles of highway and city traffic. One major complaint was poor pedal feel on the Automatic transmission fuel injection cars having some delay in return to constant curb idle; however, all were considered very satisfactory driving units.

The following summary shows results obtained on City traffic check:

CAR NO.	FUEL SYSTEM	TRANSMISSION	MILES	MPH	GALLONS	MPG
553	1957 Carter 4-BBL and Air Cleaner	Turboglide	48.4	15.4	4.2	11.52
7163	1958 RPD 4-BBL and 1958 Air Cleaner	Powerglide	44.0	14.67	3.4	12.94
281	#7014800 Fuel Injection	Powerglide	44.0	14.67	3.7	11.89
215	#7014800 Fuel Injection	3-Speed O/D	44.0	14.67	3.6	12.22
463	#7014800 Fuel Injection	Turboglide	48.4	15.4	4.0	12.10
599	#7014900 Fuel Injection	Turboglide	48.4	15.4	3.8	12.74

RECOMMENDATION AND/OR DISPOSITION

Further development work is being conducted on the #7014900 fuel injection unit proposed for 1958 release.

TEST MATERIAL

- #7014800 Fuel Injection Units (Latest 1957 Production release).
- #7014900 Fuel Injection Units (Proposed 1958 Production release).
- 1957 Production Carter 4-BBL carburetor and Air Cleaner.
- 1958 RPD Carburetor and 1958 Air Cleaner.

TEST METHOD

The following vehicles, operating in city traffic, highway economy and performance and economy checks, were used for this test:

<u>CAR NO.</u>	<u>FUEL SYSTEM</u>	<u>TRANSMISSION</u>
553	1957 Carter 4-barrel and Air Cleaner	Turboglide
7163	1958 RPD Carburetor and 1958 Air Cleaner	Powerglide
281	#7014800 Fuel Injection Unit	Powerglide
215	#7014800 Fuel Injection Unit	3-Speed O/D
463	#7014800 Fuel Injection Unit	Turboglide
599	#7014900 Fuel Injection Unit	Turboglide
