

# Technical Article: C4/C5 Corvette EMT Run-Flat Tire Servicing

## **Description:**

This four page article details the proper method for servicing C4 and C5 Corvette EMT Run-Flat tires and comes from Hunter Engineering.

Hunter Engineering Company is a world leader in automotive service equipment. Hunter Engineering Company, with headquarters in St. Louis, Missouri, offers state-of-the-art wheel alignment systems, wheel balancers, brake lathes, tire changers, lift racks and brake testers. Hunter equipment is approved and used by vehicle manufacturers, automobile and truck dealers, tire dealers and automotive service facilities around the world.

The Corvette Action Center would like to thank David Scribner, Product Manager, at Hunter Engineering for allowing us to use the information and pictures here.
