

# 1955 - 1957 Corvette: Service Bulletin: V-8 Distributor Chart

---

**Subject:** V-8 Distributor Chart

**Model and Year:** 1955 Thru 57 Passenger Cars and Trucks

**Source:** Chevrolet Service Bulletin

**Bulletin Number:** DR #291, Section VIy, April 26, 1957

**TO:** ALL CHEVROLET DEALERS

Chart on page 2 of this bulletin lists V-8 Distributors used on 1955 thru 57 Passenger Cars and Trucks with spark setting @ idle.

The numbers stamped on the distributor plates are used as a means of identification only. In some instances the service number and numbers on plats are identical.

Numbers on plats should not be used as a basis for ordering service parts.

## Spark Setting

To eliminate confusion all spark settings are now to be made at idle only.

Markings on the ignition timing tab attached to the front end cover are in 2 degree increments from the "0" marking.

In heavy duty truck operations, where spark plug burning and pre-ignition are problems, remove the vacuum spark advance.

General Motors bulletins are intended for use by professional technicians, not a "do-it-yourselfer". They are written to inform those technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions and know-how to do a job properly and safely. If a condition is described, do not assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See a General Motors dealer servicing your brand of General Motors vehicle for information on whether your vehicle may benefit from the information.
